

Chemistry Vocabulary

Grade 5, 6 & 7

Mrs. Vander Veen

Evaporation	Change from liquid to vapour
Condensation	Change from vapour to liquid
Freezing	Change from liquid to solid
Sublimation	Name for 2 changes: from solid to vapour and from vapour to solid
Transpiration	The evaporation of water from the leaves of plants
Suspended Solids	Mud and sand that floats along in the water; it's not floating and it's not sinking
Erosion	Dirt washing away from the river banks
Solution	Invisible things that are mixed in with water; eg. Salt water
Litmus	A dye
Acid	A compound that tastes sour, is corrosive & has a pH of less than 7; acid causes blue litmus paper to turn red
